About iStudiez Pro

iStudiez Pro is a productivity and organizational app found on the Apple App store for the iPhone. iStudiez Pro allows you to organize your college schedule, helps you manage your classes, helps you keep up with due assignments, and gives alerts when class is starting. It integrates seamlessly with your calendar, allowing you to see where your college schedule interacts with the rest of your life. The app also gives you an overview of your classes and shows you everything that you need to do for the day.

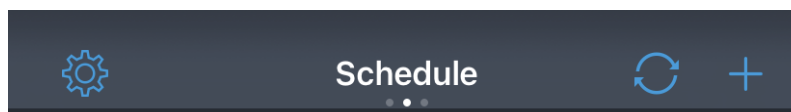

Tabs Overview

The iStudiez Pro app has four selectable tabs. These tabs are the Today, Calendar, Assignments, and Planner tabs and can be accessed by tapping their icons at the bottom of the app.

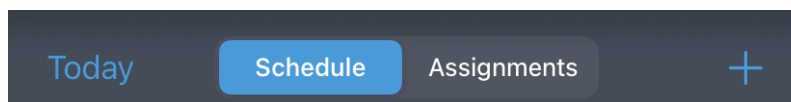

Today Tab

When you open the app, you are greeted with the today page. This page gives you information relative to the current day. If you have classes, pending assignments, or exams coming up, that information will be displayed on the today tab. Note the three dots at the top of the app. If you swipe left or right you can scroll between exams, schedule, and assignments pages.

Calendar Tab

The Calendar tab shows the calendar for the current month. This calendar can integrate with your default iPhone calendar app to present information from your other calendars. Tapping through the days in the month will provide you with information for that day. The buttons at the top determine the information you see. If the Schedule button is selected, each day will show college classes. If the Assignments button is selected, it will show pending assignments.

Assignments Tab

The "Assignments" tab shows all your current assignments. You can sort them based on due date, course, or priority. You can check each assignment off the list when you complete them.

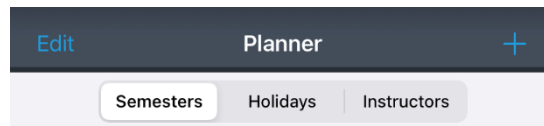

Planner Tab

Presents a list of all your semesters, holidays, and instructors.

How to Add Your College Schedule to the App

Being a college student can be stressful and difficult. Trying to remember what time and what day you have all of your classes can add to that stress. The app, iStudiez Pro, can make your days on campus easier by keeping track of your classes for you. Here's how to add your college schedule to the app.

1. Tap the "Planner"  icon.
2. While on the "Planner tab" with the "Semesters" button pressed (not the "Holidays" or "Instructors" button), Tap the "Plus"  at the top right.

Past

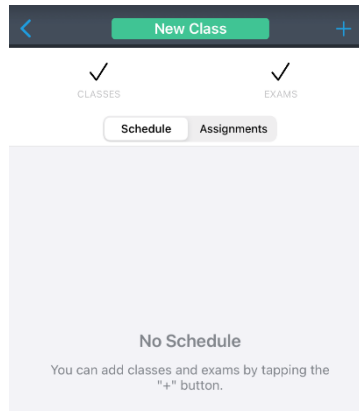

Spring 2017

4 courses

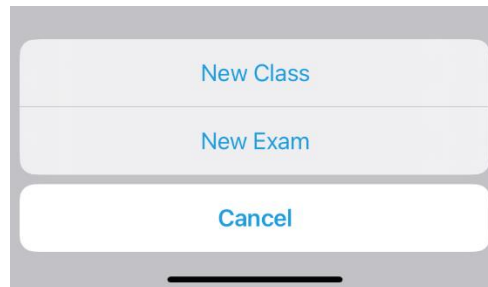

3. Type in the name of the semester. Example: Fall Semester, Spring Semester.
4. Select the start and end dates for the semester and then tap "Save."

5. Tap the new semester you just created. This will open the semester folder.
6. Tap the "Plus"  at the top right.
7. Type the name of the course and select a color to associate with the course. Tap "Save." You will be returned to the semester screen.

8. Tap the course you just created. A new page will slide in from the right. This page shows everything related to that specific class. Tap the “Plus”  at the top right. Options will display from the bottom.

9. Tap “New Class” at the bottom. A new page will slide in from the bottom with options to configure your class information.

10. Go through the options on this page to add the proper information for your course. Then press “Save.”

11. Tap the left arrow in the top left to return to the semester page. Repeat these steps from step 6 until you add all your classes for the semester.

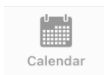

How to Add an Assignment to the App

It is important to complete your assignments for classes, but sometimes it can get difficult to remember them all when you have multiple classes. The iStudiez Pro app allows you to input assignments by class so you never need to worry about forgetting them. Here's how to do that.

1. Tap the "Assignments"  icon.
2. Tap the "Plus"  at the top right. A new page will slide in from the bottom.
3. Tap "Course" to select the course you want to add the assignment for. You will have the option to choose from the courses on your schedule. Title the assignment, select the assignment priority, and choose the due date.

4. Tap "Done" to remove the keyboard, and then tap "Save" to complete the entry.
5. Repeat these steps from step 2 until you add all your assignments for your classes.

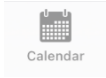

Note: You can also add assignments from the "Calendar"  tab when you press the "Plus"  at the top right while the "Assignments" Button is selected. [picture]

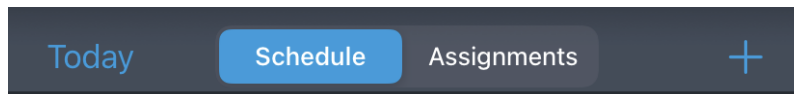

Note: You can also add assignments from the "Today"  tab when you press the "Plus"  at the top right while on the "Assignments" page.

How to Add Exams

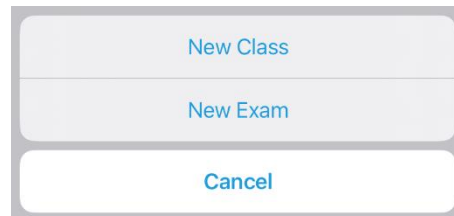

Exams are one of the most important things in college, and keeping track of them is important. With iStudiez Pro, you can keep track of every exam for every class throughout the whole semester.

1. Tap the “Calendar”  icon.

2. Tap the “Plus”  at the top right while the “Schedule” button is selected.

3. Tap new Class/Exam. A new page will slide in from the bottom.
4. Tap the course you want to add the exam for.
5. The app will give you the option to choose between “New Class” or “New Exam”. Tap “New Exam.”

6. Fill out the correct information for the exam and tap “Save.”
