# How to Download and use Google Maps App

After completing these detailed instructions you will be able to properly use the Google Maps app on the iPhone to choose a new destination and receive instructions on how to reach that location.
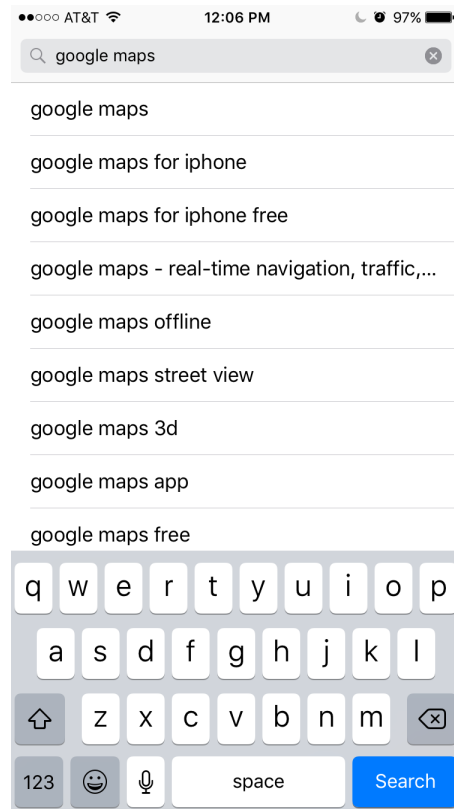

Materials: iPhone, Apple Account, and Google Maps app.

Download the Google Maps App from the App Store

1. Find the App store icon on the homepage of the iPhone.
2. Press the magnifying glass icon located at the bottom of the page to open up the search page.
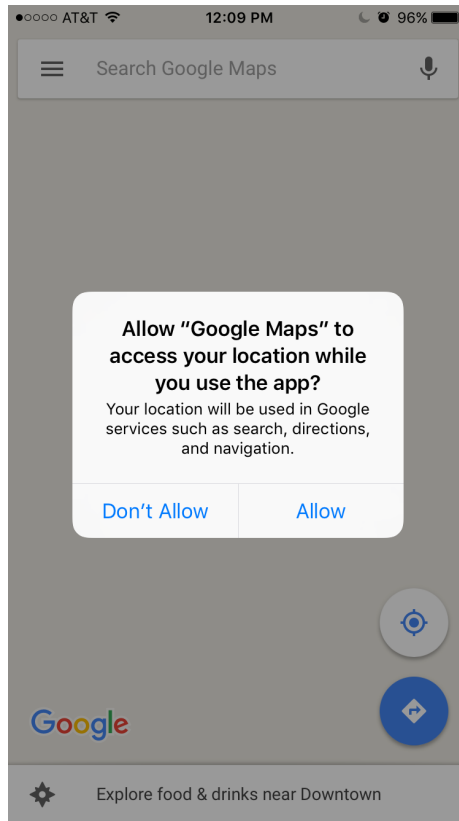

3. Type "Google Maps" in the search bar at the top and press search. The "Google Maps" app should show up on the list.

4. Press the "GET" button and the app will begin downloading.
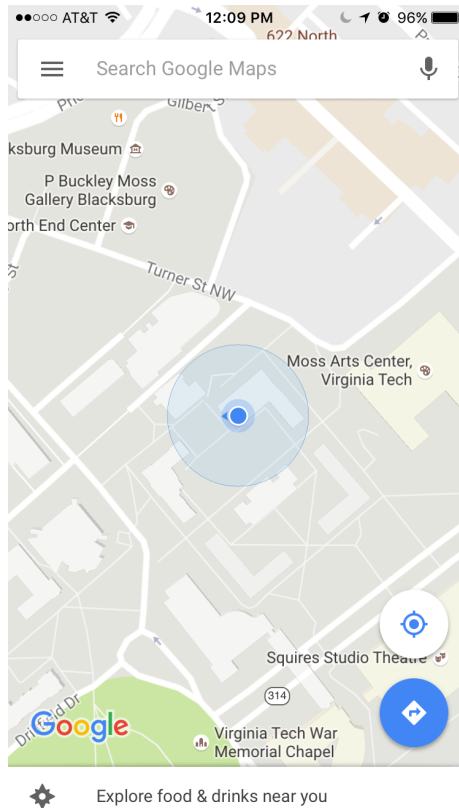

Getting Directions to Destination

1. Open the Google Maps App and press allow on the popup requesting permission to

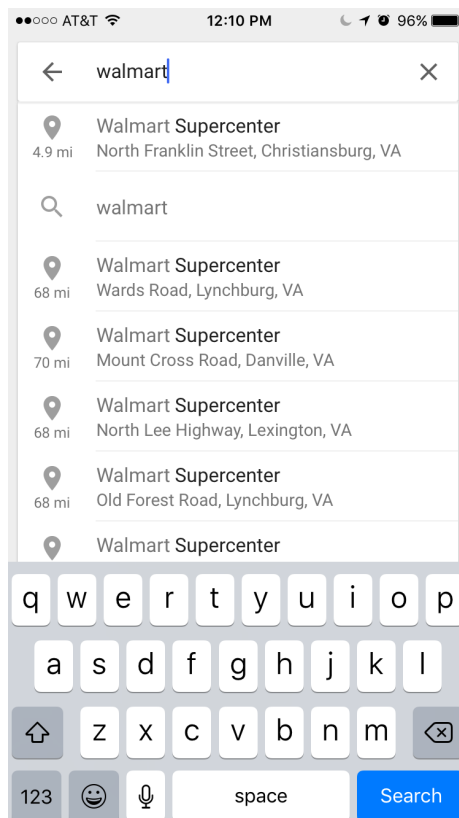

access your location while using the app.

2. To get directions to your destination enter your location in the search bar located at the

top. Depending on your destination location several places may show up.
3. Then press the blue search button located at the bottom. Your destination will be entered into the app and it will show that location on the screen.

4. Press the blue circular button located at the bottom right. The screen will change and at the top will be two locations entered. The first being your current location and the second being your destination location.
    a. Below these two entry bars are options for how you would like to travel to your

        destination. From left to right they are traveling by, car, bus, walking, and biking.
5. Press the blue button that has a white upward pointing arrow. This button should be located at the bottom right.
6. The Turn by Turn instructions to your location will now begin. Follow the instructions and drive safe.
